**DETAILED ACTION*****Response to Appeal Brief***

In view of applicants' disclosure of the common ownership of US patent 6,245,745 (used as a 103 reference in the previous Office action) and applicants' present application, applicants' citation of 35 USC 103(c) as a defense for the 103(a) rejection is found persuasive. Therefore, the finality of this rejection is withdrawn. Applicants' argument about the word "prodrug" is equally found persuasive and the rejection under 35 USC 112, first paragraph, is also withdrawn.

***Priority***

1. Applicant's claim for domestic priority under 35 U.S.C. 119(e) is acknowledged. However, the provisional application upon which priority is claimed fails to provide adequate support under 35 U.S.C. 112 for claims 1-8 of this application. For example, R6 and R7 in the present application are defined as a group independently selected from H, -C(O)(C<sub>1</sub>-C<sub>6</sub>alkyl), (C<sub>1</sub>-C<sub>6</sub>alkyl) or -(CH<sub>2</sub>)<sub>n</sub>(C<sub>6</sub>-C<sub>10</sub>aryl) and NR<sub>6</sub>R<sub>7</sub> can be taken together to form a piperidine. In the Provisional Application 60/209,023, R6 and R7 can only be H, -C(O)(C<sub>1</sub>-C<sub>6</sub>alkyl), (C<sub>1</sub>-C<sub>6</sub>alkyl). Because the definitions of certain functional groups of R6 and R7 in the present application are not supported in the domestic priority document, claims 1-8 of the present application are not entitled to the priority date of the provisional application, which is June 2, 2000. The following 103 rejection is based on the 102(a) rejection.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made

Art Unit: 1624

to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayward et al. (WO 00/32616). The reference teaches a generic group of compounds which embraces applicant's instantly claimed compounds. See formula I, Col. 2 wherein X1 is CR6R7, X2 is O and R3 can be aryl or heterocyclic wherein is substituted with R4, which can be alkyl substituted with NR5R6, etc. The compounds are taught to be useful as pharmaceutical agents for treating bacterial or protozoal infection. The claims differ from the reference by reciting a specific species and/or a more limited genus than the reference. However, it would have nevertheless been obvious to one skilled in the art at the time of the invention to be motivated to select any of the species of the genus taught by the reference including those instantly claimed, because the skilled chemist would have the reasonable expectation that any of the specie of the genus would have similar properties and, thus, the same use as taught for the genus as a whole. One of ordinary skill in the art would have been motivated to select the claimed compounds from the genus in the reference since such compounds would have been suggested by the reference as a whole. It has been held that a prior art disclosed genus of useful compounds is sufficient to render prima facie obvious a species falling within a genus.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1624

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 and 13-16 of U.S. Patent No. 6,245,745.

Although the conflicting claims are not identical, they are not patentably distinct from each other because there are overlapping subject matters between the patent and the present invention (see the previous Office action dated May 29, 2002).
